

Blocking Tape

Quest Optical are pleased to offer 2 different Blocking Tapes. Both work with Low and Medium Temp Alloys

K1609 is a conventional, co-extruded film with a strong pressure-sensitive adhesive that removes cleanly after use. Rolls are available from 35m to 200m in length

Or eliminate your waste paper with our revolutionary liner-free L2506 . No paper, no adhesive, no waste and no residue. 50m rolls ensure minimal change-overs. L2506 is the future of blocking tapes – and it works!
